

Progressive Turf

Greater Green™

5-0-7

(For Professional Golf Course & Sports Turf Maintenance)

General Information:

Progressive Turf, LLC is a manufacturer of turf products utilizing amendments that are safe and effective for all plants. When used as directed, Progressive Turf products provide the professional turf and landscape manager with a unique set of tools for developing and maintaining exceptionally high quality turfgrass.

Greater Green™ (5-0-7) is specially formulated to produce “exceptional” green color without excessive growth. **Greater Green™** promotes chlorophyll production and enzyme activity by its plant nutrient combination, and includes secondary and micronutrients in trace amounts (see web site for details) to support balanced growth.

Application Recommendations:

Greater Green™ (5-0-7) is effective as a direct foliar application or fertigation type product. It may be tank mixed or injected with other fertilizers or agricultural chemicals after conducting a jar test for compatibility. Always treat a small test area with any experimental blends to determine potential phytotoxicity before making broadscale general applications.

Greater Green™ provides a constant feed rate of 0.05 lb. of N and 0.01 lb. Fe per 1,000 sq. ft. (at weekly or biweekly intervals) when used at 12.8 fluid ounces per 1,000 sq. ft. per application. The rate may be doubled (24-26 oz. per 1,000 sq. ft.) for “curative” or “recovery” applications.

**For Commercial Use Only –
KEEP OUT OF REACH OF CHILDREN**
