

Progressive Turf

Greater Green™

5-0-7

(For Golf Course, Sports Turf & Ornamental Maintenance)

General Information:

Progressive Turf brand is dedicated to the manufacture of turf and ornamental products utilizing proprietary plant-derived extract and protein hydrolysate that are safe and effective for all plants. When used as directed, Progressive Turf products provide the professional turf and landscape manager with a unique set of tools for developing and maintaining exceptionally high quality turfgrass and ornamental plants.

Greater Green™ (5-0-7) is specially formulated to produce "exceptional" green color without excessive growth. *Greater Green™* promotes chlorophyll production and enzyme activity by its primary plant nutrient combination plus micronutrients.

Application Guidelines:

Greater Green™ (5-0-7) is effective as a direct foliar application or fertigation type product. It may be tank mixed or injected with other fertilizers and/or agricultural chemicals after conducting a jar test for compatibility. Always treat a small test area with any experimental blends to determine potential phytotoxicity before making broad scale general applications.

Greater Green™ provides 0.05 lb. of N and 0.01 lb. Fe per 1,000 sq. ft. (at weekly or biweekly intervals) when used at 12.8 fluid ounces per 1,000 sq. ft. per application. The rate may be doubled for "curative" or "recovery" purposes. For ornamental applications, use 1 oz. of product per gallon of water.

For Commercial Use Only:

KEEP OUT OF REACH OF CHILDREN

SHAKE WELL BEFORE USE

Features and Benefits

Progressive Turf Soybean & Plant Extract Fertilizers

Features

- 40% less salts than others
- Stimulates horizontal growth
- Improves mass of root systems
- Reduces hydrophobic spots
- Reduces the use of wetting agents
- Reduces algae growth on turf
- Environmentally friendly
- Contains natural auxins and cytokinins
- Mixes completely in cold water
- Will not burn – even at 3x the rates
- Rescues declining/damaged greens FAST!
- Contains carbohydrates and sugars
- Increases availability of soil nutrients
- Rapid turf damage recovery
- Unconditional guarantee

Benefits

- No salt build up in the soil
- Improves density, great fill-in, less clippings
- Increases absorption efficiency
- Improves hydration of soils for greater uniformity
- Cost savings – naturally
- Greater density and uniformity of turf
- No caustic chemicals in the environment
- Improves turf health and vigor
- Simplifies mixing and application
- Assurance of safe applications, lush turf
- Insurance for superintendents-turf managers
- Increases balance and health of microbes
- Increases availability of other products
- Aerification by 40% – ball marks by 50%
- None other like it – product confidence
